

# FILTRATION AND WATER TREATMENT EQUIPMENT SPECIALISTS

## POLYAMIDE PRESSURE VESSELS

Glaciers range of Pressure Vessels and Housings for water treatment, media filtration and water softening are made from Polyamide-6 and are a one-piece moulded construction with an internal liner of ethylene acid acopolymer to give greater chemical resistance.

Polyamide Pressure Vessels are superior and consistent in quality and reliability and gives our clients and operators great peace of mind as well as ensuring operational integrity.

### STANDARD FEATURES

- Constructed of Polyamide 6
- Fitted with Internal Distributors. 0.2mm Slotted
- Top/Bottom 150mm Access Flange
- Top/Bottom PVC Connection Unions
- 50mm or 80mm PVC Connection Sizes
- 10 Bar Maximum Operating Pressure
- Vacuum Resistant to -20kpa
- UV Stabilised
- pH Resistant 0-14
- Design Code: AD-MERKBLATT, CE, PED 97/23/EC

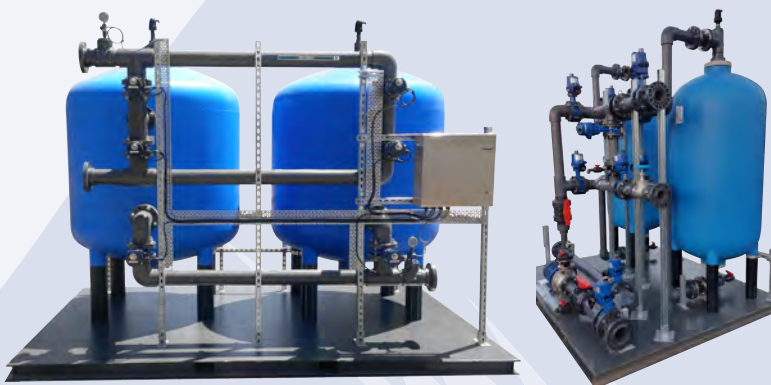

### OPTIONAL FEATURES

- Lateral Inlet/Outlet Connections
- Top/Bottom Dome Port Connections
- 0.5mm Slotted Distributors
- Sight Glass

### APPLICATIONS

- All Water, Wastewater and Sea Water
- Sand, Zeolite, Glass and other Filtration Medias
- Granular Activated Carbons
- Ion Exchange Resins
- Demineralisation & Remineralisation
