

GLACIER
FILTRATION

Corporate Profile

glacierfiltration.com.au

At Glacier, we have over 50 years combined local and international experience in designing and delivering specialist pressure filter vessels, for the water treatment industry.

Glacier delivers the largest and most advanced range of pressure filter vessels globally.

Our speciality is custom building pressure filter vessels to suit your specific project requirements as well as a complete range of standard vessels.

With offices in Australia and New Zealand we operate globally and are trusted advisors in the industry, with an unmatched track record of providing superior and bespoke pressure filter vessels.

Our valued clients include process engineers, remediation professionals, councils, hydraulic and environmental consultants. We partner with organisations that design, construct and operate water and wastewater treatment solutions for all types of mechanical filtration, desalination, absorption, softening and remineralisation.

Understanding the needs of the industry, we are focused on innovation and technology improvements, developing cutting-edge solutions for some of the most demanding applications.

In-house Customised Design

Our design engineers draw on deep expertise to deliver custom pressure vessels to suit the specific requirements of any project across a diverse range of environments.

Glacier's in-house team work closely with clients following our 7 step streamlined process to design and deliver specialist vessels suited to the project specifications.

Whilst Glacier Filtration pride themselves on meeting unique design requirements of individual clients, we also offer a range of standard vessels to achieve ultimate versatility of application.

Global Experience

Providing Worldwide Operator Satisfaction through Product Excellence

Glacier Filtration is a truly global company.

Thanks to our strong logistics network and international logistics partners, we can deliver specialised pressure filter vessels to almost any location across the globe.

We have designed and delivered an extensive range of vessels, now installed and operating worldwide.

Despite our international reach, we pride ourselves on offering each customer completely personalised services.

We monitor every stage of transportation to ensure every order's safe delivery, no matter where it is being delivered across the world.

Superior Quality

We thrive on a culture of continuous improvement and are committed to ensure we provide our clients with consistently high quality equipment. A key focus is to ensure that we exceed the needs of every customer.

Glacier Filtration has achieved ISO 9001:2015 ; the international standard for quality assurance. Certification to this standard involves an independent assessment of products and processes to ensure that we fully understand what our customers want and are delivering those requirements efficiently.

Streamline Process

Our streamline process is one of the reasons clients engage with us to provide equipment for projects of every scale.

We are a dynamic group united in our vision to help streamline the procurement process for our clients.

Our streamline process embraces lean principles to ensure a faster overall delivery whilst maintaining a high level of quality and attention to detail.

1. Client Consultation

Our trusted advisors work closely with you to gain absolute understanding of your project requirements, so that we can provide assistance in calculating and sizing vessels.

2. Innovative Design

Partnering with Glacier means access to our in-house team of design engineers who work closely with you to design your specialised vessels.

3. Presentation and Review

Our team will present you with a detailed proposal including technical data and specialised drawings, with the opportunity to make any final adjustments.

4. Manufacture and Assembly

Our dedicated team oversees all aspects and phases of the manufacturing process to ensure it is delivered to exceed your expectations, guaranteeing the perfect solution on time and within budget.

5. Testing and Factory Acceptance

Glacier vessels are delivered with the assurance of high quality due to the comprehensive technical testing that is performed including Hydrostatic Pressure Testing.

6. Delivery

Our team ensures the delivery process is seamless, as we take the time to understand your site requirements & ensure delivery aligns with unloading facilities.

7. Training and Support

Enjoy peace of mind knowing that we provide complete and guaranteed after sales support, including ongoing training and technical support. We provide you with the relevant user manuals and spare parts for our specialised equipment. We take away your risk and provide you with real quality and value.

Driven by Purpose, Guided by Values

Everyday we are driven by a strong purpose – to provide our clients with superior products and intelligent solutions whilst continually redefining quality in the water treatment industry.

Together we've crafted the vision, mission and values that are the very essence of being Glacier. They guide us as we manage our day to day operations and meet any future challenges.

Our Vision

Our vision is to establish Glacier as the global market leader in delivering innovative industry leading water filtration equipment and best practise solutions.

Our Mission

Our mission is to collaborate with professional partners to deliver effective, efficient and innovative solutions, through our proven unequivocal excellence in the water treatment industry.

Our Values

Honesty & Integrity

- We are committed to working with integrity.
- We pride ourselves on treating our people, clients and suppliers with honesty and transparency.
- We demonstrate reliability & trustworthiness.

Accountability

- We are accountable for our actions.
- We take responsibility for our behaviour, always thinking and acting in a safe manner.
- We honour our commitments.

Excellence

- We have a commitment to excellence.
- We strive to ensure every aspect of our business functions at the highest level.
- We are driven to improve our business practices and ensure our equipment is of consistently high quality.

Collaboration

- We believe that collaborating and sharing is a winning strategy.
- We proactively contribute ideas, knowledge and skills to create a better future for all.
- We work collaboratively to find solutions, always pushing boundaries to achieve better outcomes for all.

Our People

Professional

- Everything we do is to a high standard.
- Exceeding expectations every time.

Intelligent

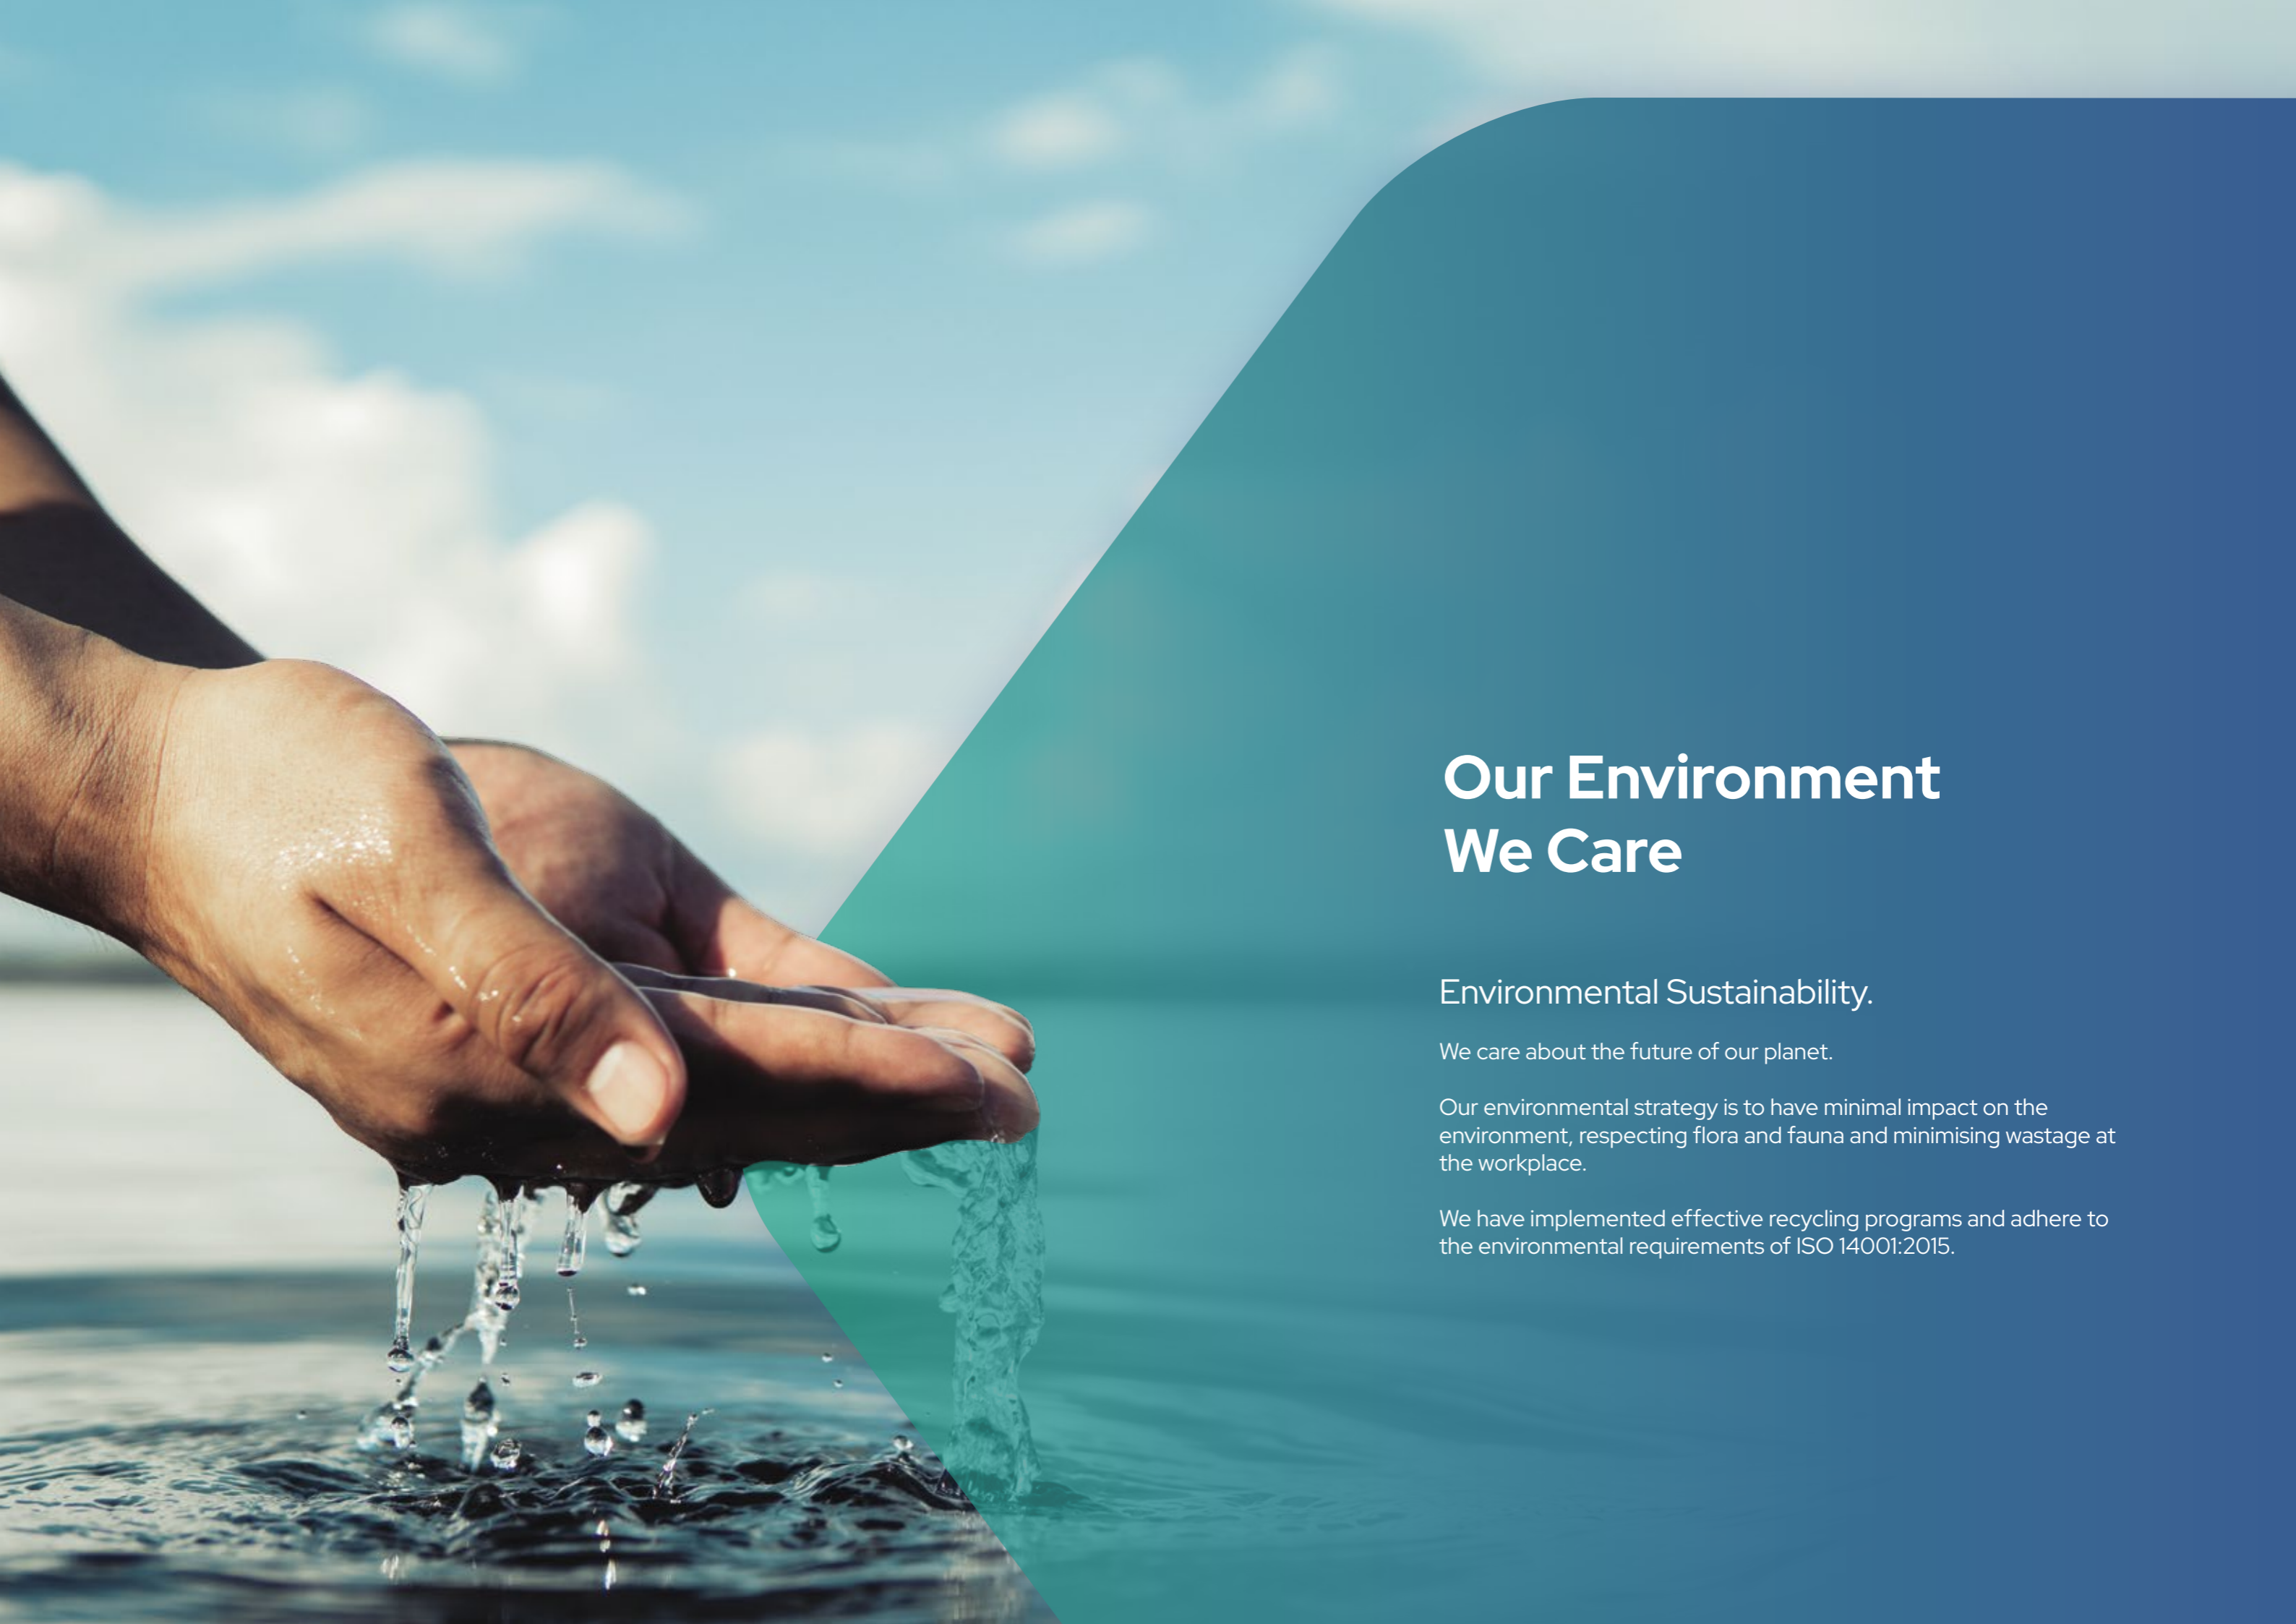

- We are creative thinkers.
- We are thoughtful and conscious in everything we do.

Innovative

- We are continually evolving in everything we do.
- Together we are creating better solutions within every facet of business.

Our Environment We Care

Environmental Sustainability.

We care about the future of our planet.

Our environmental strategy is to have minimal impact on the environment, respecting flora and fauna and minimising wastage at the workplace.

We have implemented effective recycling programs and adhere to the environmental requirements of ISO 14001:2015.

Our Community We Care

We care about the needs in the local and global communities.

Giving back to the community is at the core of our company, the heart and soul of Glacier.

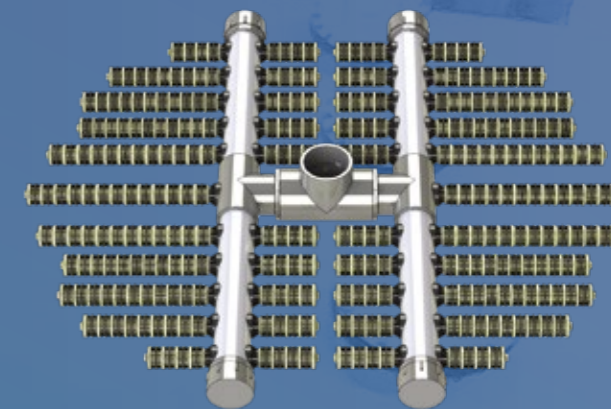

We are proud supporters of the Heart Foundation, The Kids Cancer Project, The Breast Cancer Institute of Australia, Oncology Children's Foundation and many other charitable organisations.
